**DeepL**
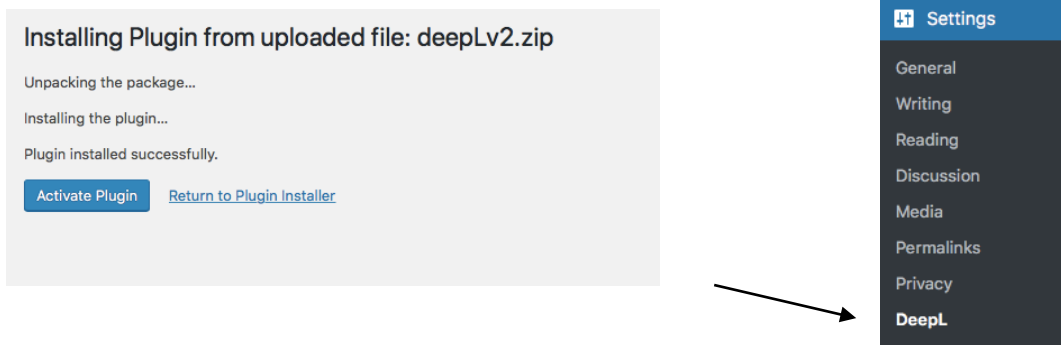

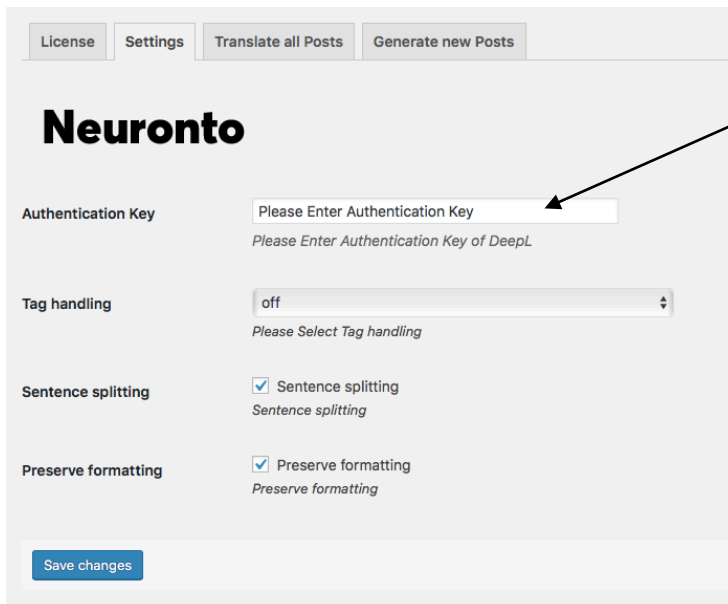

1. Enter License Key provided in your confirmation Email and click Save:

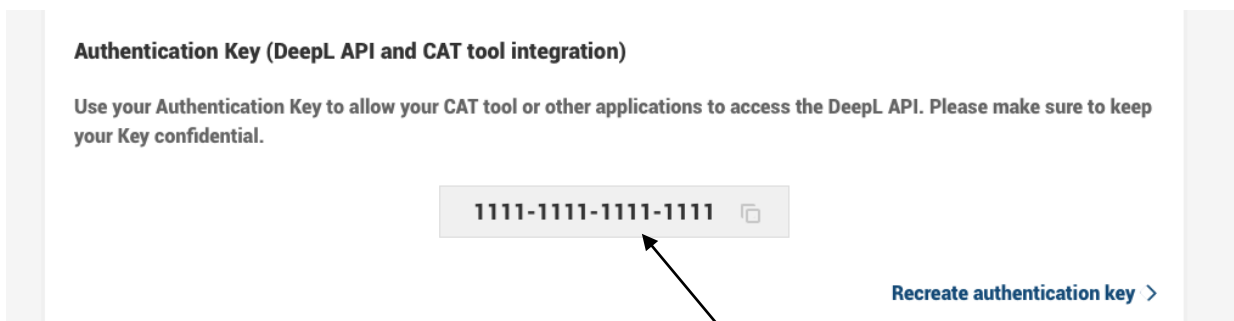

2. Enter DeepL API Key and click Save:

You can find your API Key here: https://www.deepl.com/pro-account.html
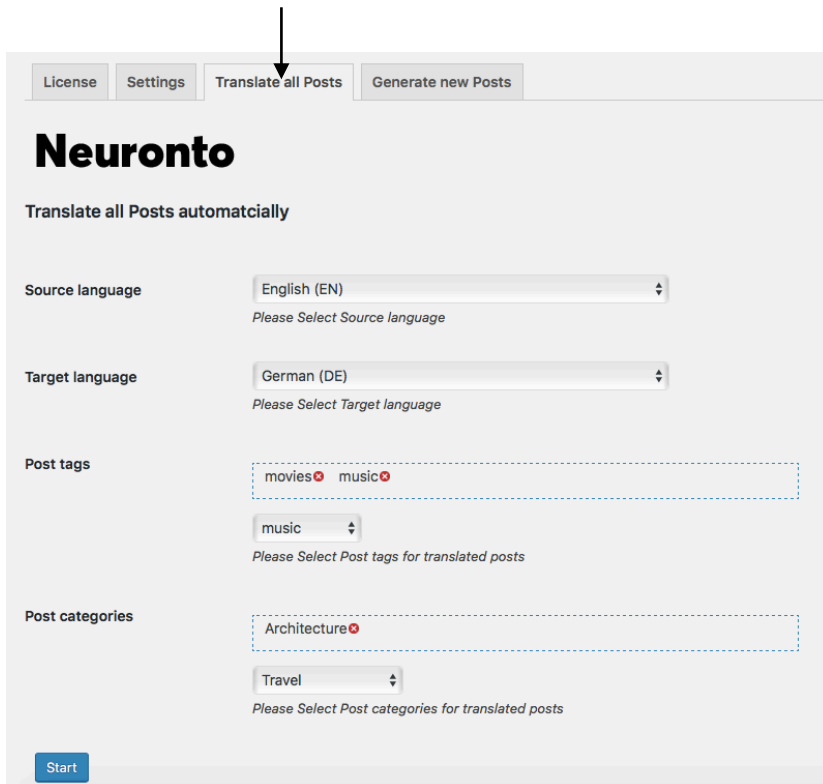

After you have successfully saved your license and API keys, you can start Neuronto.
Please reload your URL / re-open Plugin after **each translation process**!

The Translating Feature **overwrites the Posts to a New Language**.
Please make Backups of your current posts if you want to keep them in their original language, or use the "Generate Posts" function.
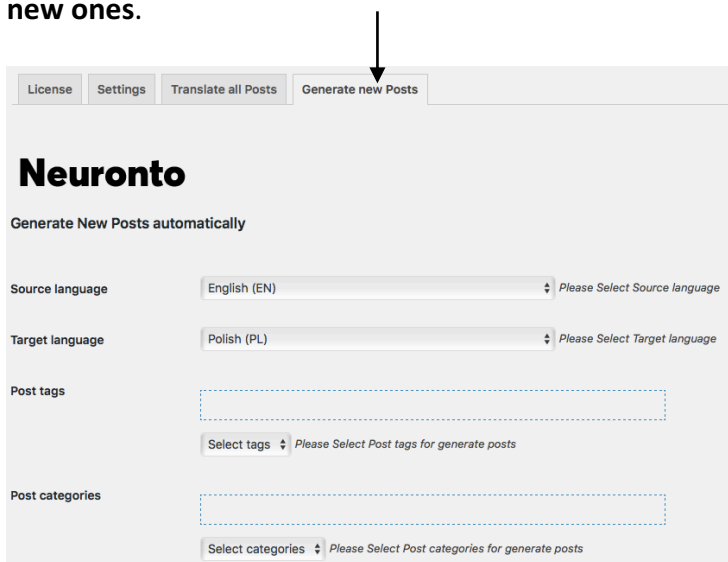

You can choose Tags or Categories of Posts to translate, or leave everything blank if you want to translate all Posts.

Use „Generate new Posts" If you want to keep your **Original Posts unchanged** and generate **new ones**.

You can open any Post to see if it has **already been translated by DeepL**.

Translated / Generated Posts will immediately receive a check in the box and would not be touched again in the future.
You can uncheck it if you want to have the Post translated again.
